

DECLARATION

Having in regards the followings:

- COMMISSION DECISION of 25 May 2005 establishing the classes of external fire performance of roofs and roof coverings for certain construction products as provided for by Council Directive 89/106/EEC (notified under document number C(2005) 1501) (Text with EEA relevance) (2005/403/EC)
- COMMISSION DECISION of 21 August 2001 implementing Council Directive 89/106/EEC as regards the classification of the external fire performance of roofs and roof coverings, (notified under document number C(2001) 2474) (Text with EEA relevance) (2001/671/EC)
- COMMISSION DECISION of 6 September 2000 implementing Council Directive 89/106/EEC as regards the
 external fire performance of roof coverings (notified under document number C(2000) 2266) (Text with EEA
 relevance) (2000/553/EC).
- Infrared reflective coatings reflect heat (infrared radiation).
- Cool Barrier waterbased roof coating system exhibits strong infrared reflection.
- Cool Barrier waterbased roof coating system has no Flash Point.
- Cool Barrier waterbased roof coating system when applied performs a dry film thickness equal to 500 microns free of VOC's and based on inorganic fillers, extenders and fillers by up to 70 percent.
- "Conventional waterbased coatings do not increase the flame spread of either non-flammable or flammable substrates upon which they are applied" Flammability of Paint Study, National Paint and Coatings Association, Inc., 197

We hereby declare that Cool Barrier waterbased coating system when regularly applied performs a dry film which protects the underlayer/substrate from heat radiation and does not affect the fire resistant class of the underlayer/substrate in case of external fire conditions. The suitability of the product in a particular location under specific local fire safety legislation and fire safety building codes must be always determined by the final user's experience, knowledge and responsibility.
